## EDUCATION

<b>Texas A&amp;M University, College Station, Texas</b> Master of Science in Management Information Systems	<b>Aug 2024 – May 2026</b> GPA: 3.83/4.00
<b>Sardar Vallabhbhai Patel Institute of Technology, Gujarat</b> Bachelor of Engineering (BE) in Computer Engineering	<b>Jul 2017 – Jul 2021</b> GPA: 3.95/4.00

## WORK EXPERIENCE

<b>Utilities and Energy Services</b> Graduate Assistant – Data & Automation Engineer	<b>May 2025 – Present</b>
<ul style="list-style-type: none"><li>Orchestrated Python ETL for daily energy, weather, and 50,000+ real time sensor feeds from 15 heterogeneous sources into structured SQL <b>automating Power BI reporting</b>, with schema validation, reduced manual work 95% and saving 300+ hrs./year</li><li>Designed a week-ahead <b>forecast workflow automation</b> for integrating ERCOT market price, weather, and solar generation with selenium, pandas, openpyxl, increasing forecast accuracy by 30% and supporting cost optimization by 20% annually</li><li>Digitized billing through an <b>OCR pipeline</b> (pytesseract, pandas, openpyxl) and published a YoY dashboard, reaching 97% accuracy, shortening processing from 2 hours to 6 minutes, removing manual entry, &amp; flagging 3% of billing outliers for review</li></ul>	
<b>Black Tie Concierge LLC</b> AI & Data Intern – Digital Product Strategy	<b>May 2025 – Aug 2025</b>
<ul style="list-style-type: none"><li>Developed a luxury travel <u>platform</u> (Next.js, TypeScript, Supabase; Stripe, Google Maps &amp; Resend API) that generated \$10K+ revenue, &amp; 3x traffic growth, and 150+ leads in 3 months, reinforced by <b>SEO/GEO</b> strategies &amp; instant-quotes generation</li><li>Automated the post-booking pipeline using AI(<b>NLP</b>) + low-code(<b>n8n</b>): confirmation on booking, receipt on payment (auto bill #), calendar invite and auto driver assignment—shrinking cycle time by &lt;1 minute &amp; cutting communication errors by ~90%</li><li>Built scalable database for users, rides, &amp; payments; with <b>real-time ingest &amp; data archiving</b>, optimizing data hunt time ~80%</li></ul>	

<b>Tata Consultancy Services (Equifax)</b> Data Engineer (POC Lead)	<b>Aug 2021 – Aug 2024</b>
<ul style="list-style-type: none"><li>Modernized 60+ legacy <b>SAS</b> Code to <b>Python</b> Scripts (pandas/NumPy, I/O, and <b>multiprocessing</b>), added standardized configuration, and logging, cutting runtime 80%, compute cost 50%, and tripling peak-hour throughput while meeting SLAs</li><li>Replaced 15+ excel report with <b>interactive dashboards</b> reducing errors by 90% and boosting data-driven decisions by 15%</li><li>Implemented <b>QA with Python validation script</b> (pandas, openpyxl/pywin32) compared SAS vs. Python outputs and flagged outliers and produced audit reports, eliminating ~90% manual checks and compressing test cycles from 3 days to 2 hrs</li></ul>	

<b>Migration Analyst</b>	
<ul style="list-style-type: none"><li>Migrated On-Prem workflows to GCP, building <u>data-fabric</u> that unified 7 external data aggregators with address standardization, match-key dedupe; increased hit ratio by 45% and reduced lookup by 93% eliminating cross-table travels</li><li>Standardized heterogeneous client files via a <b>GCP ETL</b> jobs (clean PII, address/ZIP normalization, dedupe) into canonical schemas, enabling reliable matching at scale and increasing hit rate by 45% while reducing inquiry turnaround 93% time</li><li>Collaborated with <b>cross-functional teams</b> to align AI and Data strategy with <b>business goals</b>, improving client data quality</li></ul>	

## PROJECTS

<b>Document Classifier</b>   <a href="#">[Github]</a>   <a href="#">[Video]</a> : Multi-modal AI classifier using Claude Haiku 3.5 and Gemini Flash 2.0 with dynamic prompt trees to classify 100+ regulatory documents at 98% accuracy across 4 sensitivity levels with PII detection, HTML and audit citations
<b>CHAT-C.P.T.</b>   <a href="#">[Demo]</a> : An agentic AI solution made using RAG, LangChain, FastAPI, and Streamlit to simplify semester degree planning for prospective students using 24/7 personalized chatbot with scalable and secure infrastructure along with guardrails
<b>Market Basket Analysis</b>   <a href="#">[Article]</a> : Built an EC2 data platform (MariaDB/MongoDB; SQL views/triggers/stored procedure) and applied ML model to expose customer spend patterns and product pairing, improving efficiency 30% and lifting sales 30% YoY
<b>Exploratory Data Analytics</b>   <a href="#">[GitHub]</a>   <a href="#">[Video]</a> : Created dashboards to support data-driven decisions, predicting product sales and strategically targeting a 20% revenue increase by translating complex data into actionable business insights using Microsoft Excel

## TECHNICAL SKILL & CERTIFICATIONS

**Technologies:** Python, C, SQL, TypeScript/JS, Java, Bash; Postgres/MySQL/SQL Server; BigQuery/Snowflake; AWS, GCP, Azure

**Tools:** Airflow, dbt, Kafka; Docker, Kubernetes; GitHub Actions (CI/CD), Serverless; Power BI, Excel, GitHub, Tableau, Fast API

**Certification:** Microsoft Azure Associate [\[DP-203\]](#), [\[AZ-104\]](#), Fundamentals [\[DP-900\]](#), [\[AI-900\]](#), Professional Scrum Master [\[PSM 1\]](#)

## LEADERSHIP & ACHIEVEMENT

- President, Buddy Connect @TAMU: Led industry speaker and resume sessions for students, driving impactful networking
- IGSA @TAMU: Coordinated 20+ cultural events reaching 10000+ student, driving community engagement by teamwork
